

Mpc. Ride a Masterpiece.

Care Instructions

Dear Mpc. Rider,

You're now the proud owner of an extraordinary product, that showcases what can be achieved at the pinnacle of carbon manufacturing. You'll notice that your new Teammachine R Mpc. features a 'raw' look finish, highlighting the beauty of the carbon fiber construction and offering a supremely lightweight build.

With this in mind, please be aware that the decals are not covered by a clear coat, so special care has to be taken to avoid damaging them. In case of damage to the decals, we do offer additional decal kits with different types of design options available.

In order to avoid decal damage consider the following:

- Do not use pressure washers for cleaning
- Do not roughly wipe with sponge or towel over decal surfaces
- Do not roughly dry or polish decal surfaces

We recommend the following:

1. Gently rinse your bike with water using a regular garden hose
2. Spray bike cleaner on the surfaces to be cleaned, wait some minutes
3. Use a small sponge to clean the decal free areas as you would regularly
4. Carefully dab with small little sponge over the decal areas
5. Gently rinse your bike again, using a regular garden hose
6. When drying, drying towel and start by drying the decal free areas
7. Gently dab the drying towel over the decaled areas
8. If using a surface protection solution, first try on a small & hidden surface and if possible avoid the decaled area as well as you can.

Now, time to take this Masterpiece out for ride, and discover the real magic!

Sincerely,
Your BMC team
