4. LIGHTING UPGRADES

- Notch is compatible with 12-volt lights that have maximum current draw of 1100mA front and 400mA rear.
- Ebike lights will ship with a cable that must be connected to one of the Bosch cables below
- Headlight Cables: 1600mm (EP1647), 1400mm (EP1614), 200mm (EP1615),
- Taillight Cables: 1400mm (EP1612), 200mm (EP1613)
- Lighting wires are dependent on frame size. Measure between the drive unit and where the light will be mounted to ensure correct length.

FAQ'S:

Q: How do I care for the Bosch system and batteries?

A: Follow the care instructions in the [Bosch eBike Battery Tips Manual](#).

Q: Can I change the top speed of my Bosch system?

A: No. Notch is equipped with the Bosch Performance Line CX drive unit and is limited to 20mph (32kph) top speed.

Q: Is the motor serviceable?

A: No, the internals of the motor are not serviceable. Bosch drive units are designed to last many years. Be sure to keep the Bosch system software up-to-date via the Bosch eBike Flow app.

Q: Is the battery removable?

A: Yes, the Bosch PowerTube 500 internal battery can be removed by detaching the motor and sliding the battery out of the downtube through the motor node.

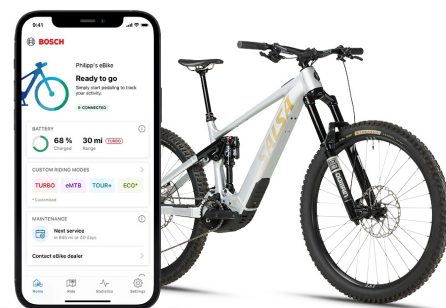

Q: What does the end user experience look like?

A: Consumers can customize settings, track rides, and adjust motor output with the [Bosch Flow App](#).

Q: What if I have a Bosch questions or need to submit a warranty claim?

A: Contact the Bosch Service Hotline at service@bosch-ebike.us or call 844.723.2453 and press 1 for Technical Support. For the best service, please be prepared to share a diagnostic report and results of all troubleshooting measures taken.

BOSCH FLOW APP

- Customize riding modes for your riding style
- Displays motor, battery, and software status
- Compatible with Bosch eBike Lock to electronically lock your ebike
- Allows for route planning and navigation
- Provides over-the-air firmware updates
