Included

(2) Boat Ties

(2) Bow/Stern Sets

(2) CLASS 2 Racks

(2) Mounting Plate

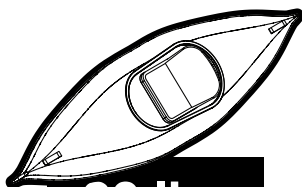

(4) M6x75mm Bolt

(4) T-Knobs

(4) M6x95mm Bolt

80 lbs

Maximum Boat Weight

3.5"

Max Crossbar Width

2" | .5"

Max / Min Crossbar Height

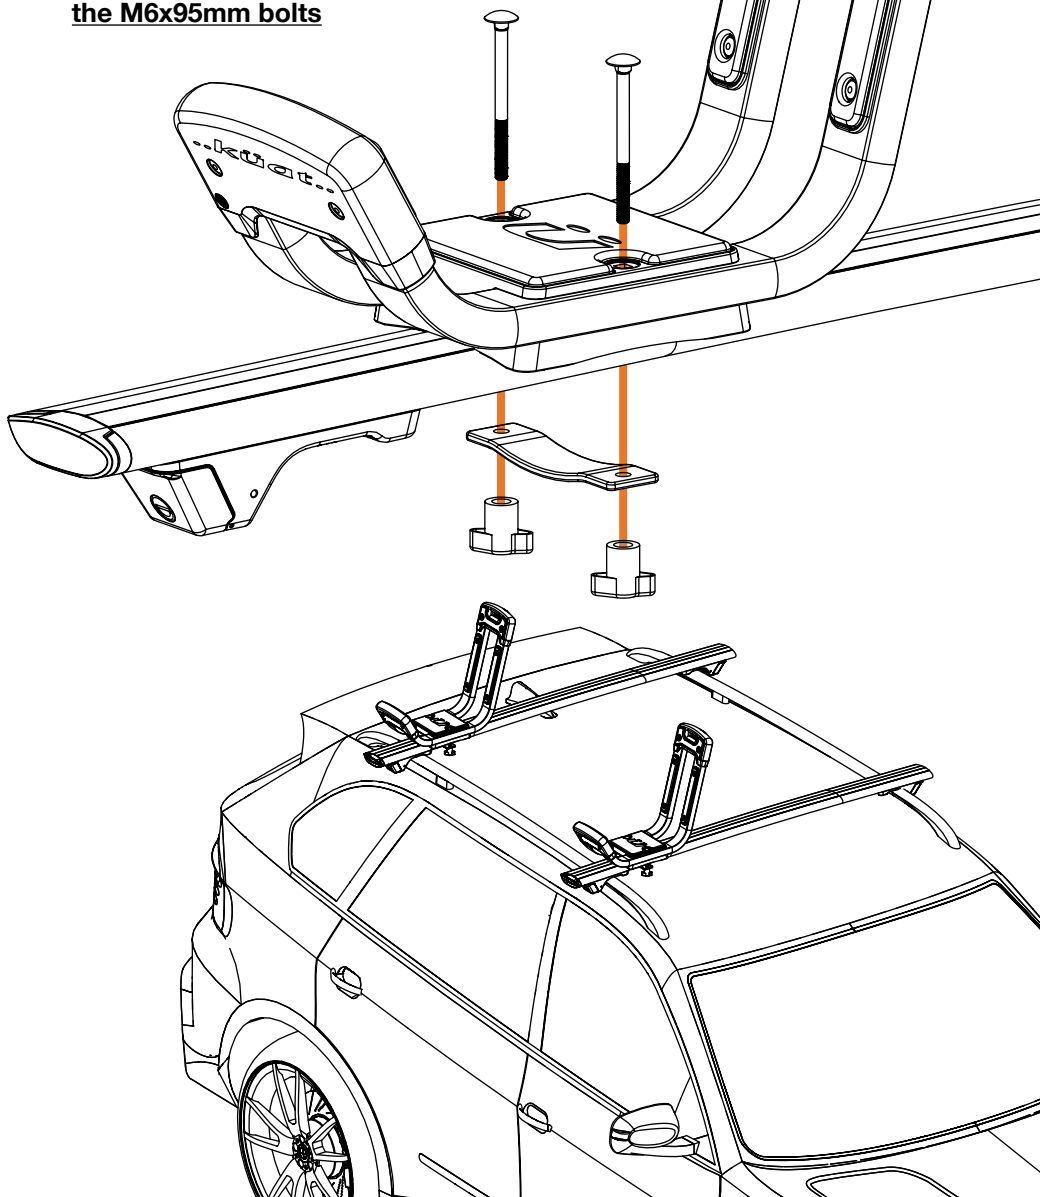

Class 2 will work with round, square & aero bars within this size range.

Mounting the CLASS 2™

❶ Align the Class 2 on your vehicle crossbar.

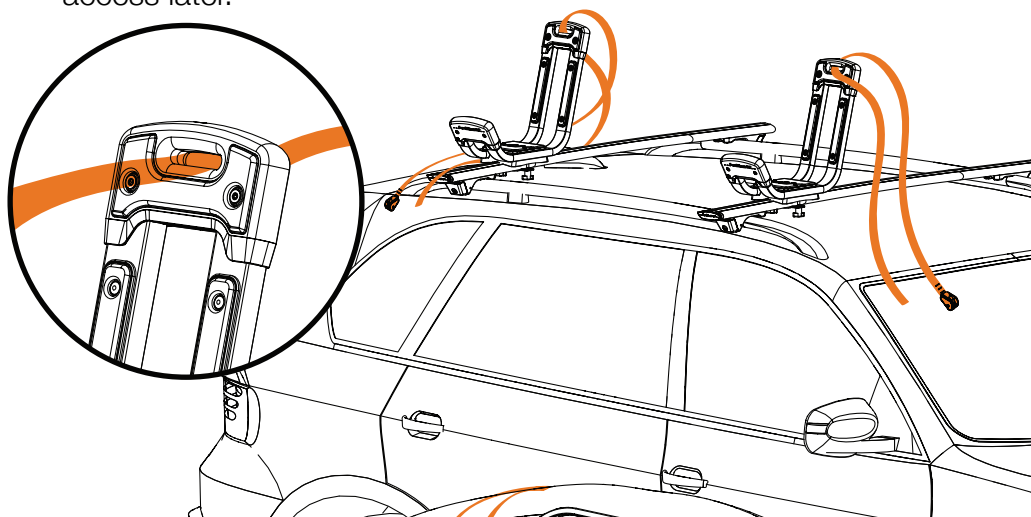

❷ Align (2) **M6x75mm bolts**, (2) **T-Knobs**, and (1) **Mounting Plate**.

⚠ **Your crossbar size may require the M6x95mm bolts**

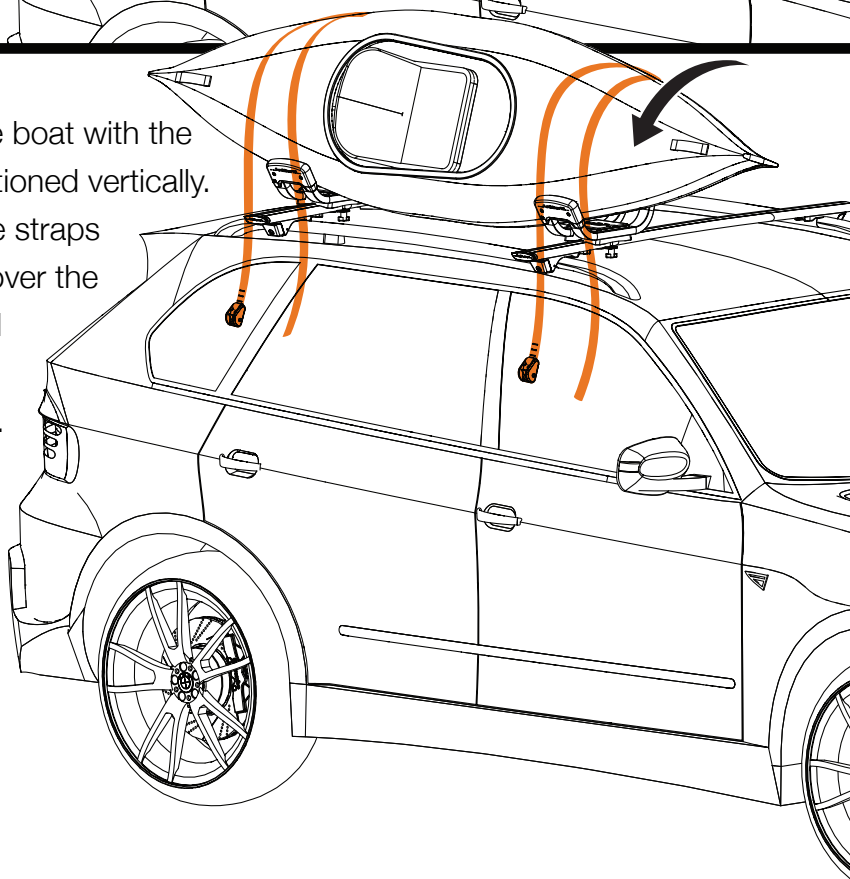

Feeding straps and loading boat

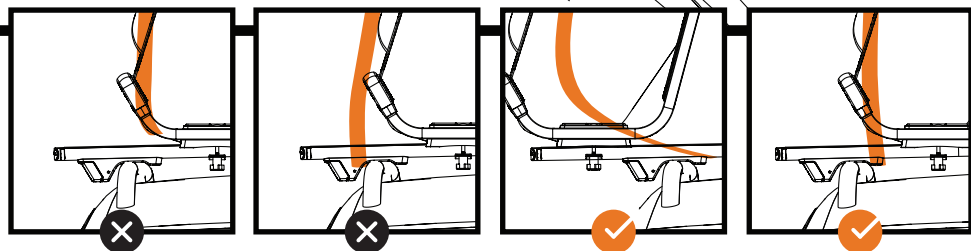

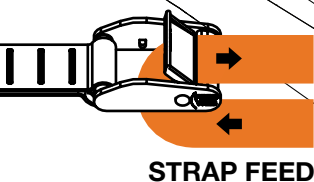

- 3** Thread the straps through the straps port in each CLASS 2 upright. Pull the straps through and place them on each side for convenient access later.

- 4** Load the boat with the hull positioned vertically. Bring the straps up and over the bow and stern of the boat.

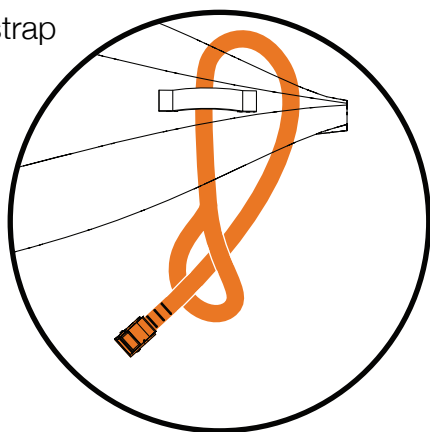

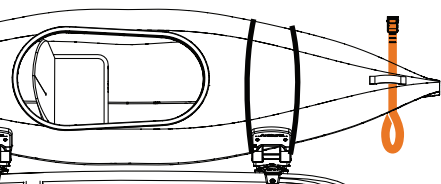

- 5** Loop strap around crossbar and into cam buckle. Ensure a secure fit, and manage any excess strap by using the provided Velcro® style strap to secure.

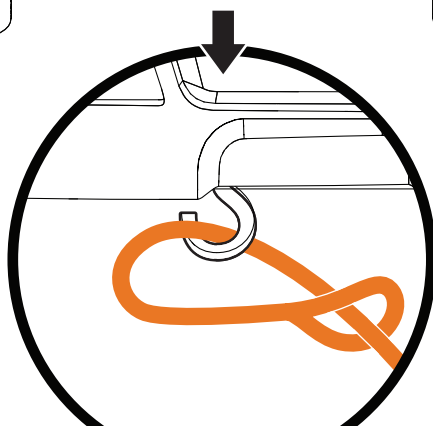

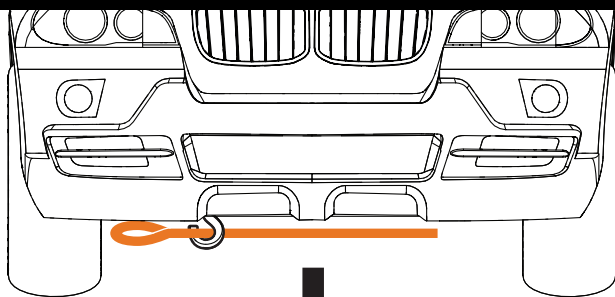

! Strap should always be secured under vehicle crossbar and behind vehicle roofbar.

Fixing bow and stern lines

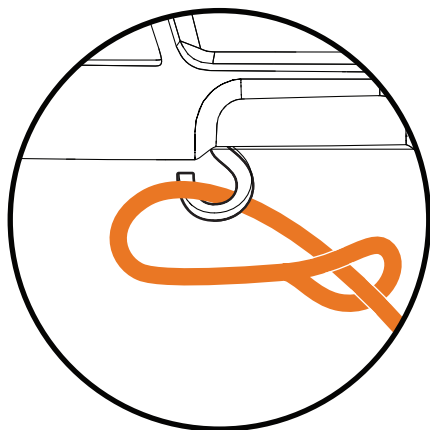

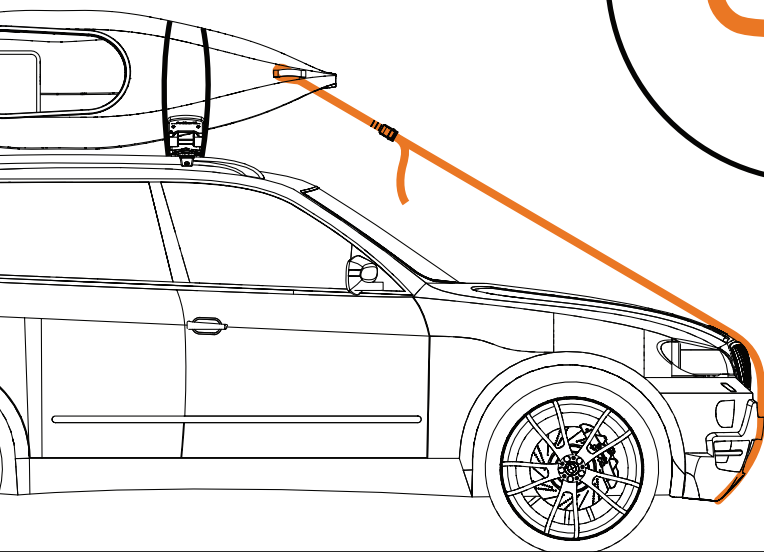

- 6** Thread the cam of the short looped strap through the bow handle and loop it back through.

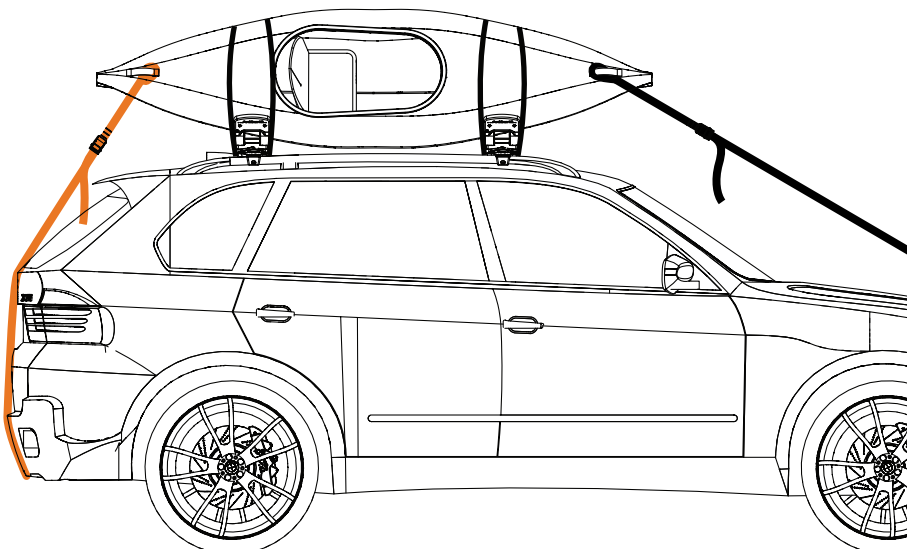

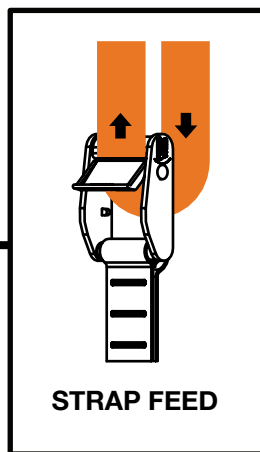

- 7** Secure the looped connecting strap by passing it through the tow hook and looping it back through.

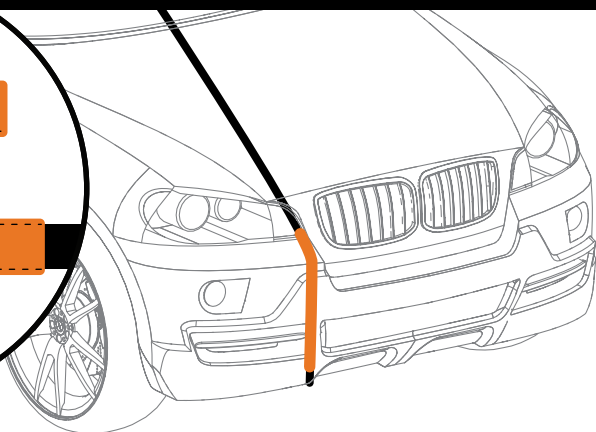

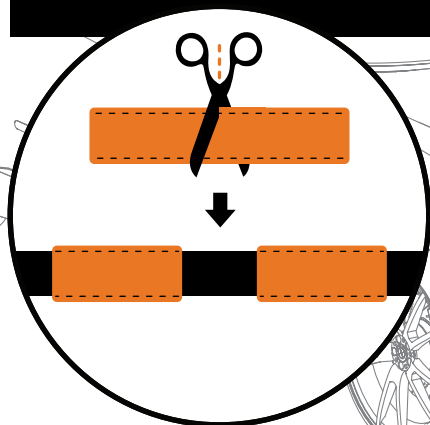

- 8** Feed tow hook strap into cam strap affixed to bow handle to secure bow line.

- 9** Repeat step 8 for the stern line.

- 10 Tow hook straps feature a protective sleeve to guard against contact between the strap and your vehicle. If more than one contact point exists, this protective sleeve can be cut and resleeved to provide protection over additional areas.

Küat Rack Warnings

CLASS 2™

Max Boat Weight

80 lbs

WARNINGS

- Follow instructions for proper assembly, installation and use.
- Do not exceed your vehicle's crossbar load limits.
