Mounting Universal Flip™ Mounts

- 3** With Grip™ open, align (1) Flip™ mount and (1) M6 bolt with front bolt hole.

! Note: M6x18 washer is pre-assembled in this location.

- 4** Thread M6 bolt into Flip™ mount and tighten with the included M5 hex key.

! The Grip™ 6 features two forward mounting locations.

Location 1 for any standard crossbars.

Location 2 for narrow crossbars, or a bias toward one side of the vehicle

- 5** Pull against the tray tab to unlock, then slide Grip™ tray outward, exposing rear mount bolt hole.

- 6** Align second Flip™ mount, (1) M6 Bolt, and (1) M6x18 washer with rear bolt hole.

- 7** Thread M6 bolt into Flip™ mount and tighten with M5 hex key.

- 8** Repeat these steps for the second Grip™ rack.

Using the Universal Flip™ Mounts

- 9** Pivot lever upward to release strap.

- 10** With both Flip™ mounts open, place Grip™ onto crossbar in the desired location, looping Flip™ straps under and back into the strap lever.

- 11** Close Flip™ mount lever and repeat for opposite side.

- 12 Snug mounts to crossbar by retightening the strap tensioner using the provided M4 hex key.

! When tightening Flip™ straps, check the lever periodically. Lever should be snug, but not too difficult to articulate. Once straps have been properly adjusted to the crossbar, further adjustment should not be necessary to remove or reinstall the Grip™ racks.

- 13 Repeat steps 9 - 12 for second Grip™ being sure both Grip™ racks are aligned with each other.

! Always check that Grip™ racks are secure prior to travel.

Securing Flip™ Mounts

- 14 After each Grip™ has been installed to the crossbar, secure the Flip™ mounts using the provided key and integrated lock on the side of each mount.

Grip™ Leveling

Depending on your crossbars and vehicle, it may be necessary to adjust the angle of your Grip™ racks so that they sit level relative to the vehicle roof.

- 15** Adjust the angle of your mounts and Grip™ rack using the angle adjustment bolt and the provided M4 hex key.

- 16** After adjustment, confirm both Grip™ racks are relatively level with the roof of the vehicle and retighten angle adjustment bolt.

(See Steps 1 and 2)

- 18** Pull against tray tabs to unlock and slide Grip™ trays outward.
(See step 5)

- 19** Load thickest skis first, with ski tips toward rear of vehicle.
Keep at least .5" of clear space between skis and tray edge to prevent potential for damage when closing Grip™ racks.

- !** Downward facing bindings may cause interference with factory side rails when using the slide-out tray feature.

- 20** Once loaded, slide trays in **simultaneously** to prevent binding.

- 21 Close and secure each Grip™ rack.

- 22 Confirm tab is in the **locked** position.
