**STEP 1.** Align the trays with the holes on the center beam by matching the coordinating labels.

Then alternate between bolts to tighten.

**Parts Needed:**

4x M8 Nut

3x M8x160 Bolts

**NOTE:** The trays with the “..Küat..” Logo will be farthest from the hitch. Performing this step with the rack upside down will ease assembly.

**NOTE:** This tray has the M8x160 bolt pre-installed.

**STEP 2.** Remove the end cap from your NV Base 2.0.

**STEP 4.** Connect the Add-On to the NV 2.0 while aligning the bolts with the threaded holes found in the center beam on the NV 2.0

**STEP 4.** Using an 8mm Allen wrench, alternate tightening the bolts.

**NOTE:** Tighten the bolts and check bolt tightness periodically.

**STEP 5.** Reattach the end cap to the rack.

# Using the NV BASE 2.0 Bike Lock

- ! If your NV BASE 2.0 uses the side-entry cable lock system, follow **Section 1** to ensure proper lock mechanism usage.

- ! If your NV BASE 2.0 uses the rear-entry cable lock system, follow **Section 2** to ensure proper lock mechanism usage.

- 1 Pull the lock and cable out from the rear tire tray.

**NOTE:** When re-inserting the lock cable into the rack there should be a positive engage between the cable and the magnet in the back of the tray.

- 2 Loop the cable through the rear triangle and insert the lock tip into the lock found on the cable.

**NOTE:** Each lock cable is designed to lock a single bicycle. Do not lock the two cables together.

## Section 2

## Using the Rear-Entry NV BASE 2.0 Lock

- 1 Slide lock assembly out of tray until cable is fully extended.

- 3 Feed cable through rear triangle of the bike and secure cable tip into the lock port.

# Küat RV Compatibility Warning

Küat's receiver hitch-mounted bicycle racks may be used with some recreational vehicles (RVs) as described below. Many types of RVs subject the rack and bicycles on it to high forces and extreme movements. As a result, Küat does not recommend using our receiver hitch-mounted products on RVs that will likely expose the rack to unacceptable conditions.

Küat's standard warranty will cover use of any of its 2-inch receiver hitch-mounted bicycle racks on motorhomes (as defined in 49 C.F.R. 571.3) satisfying all of the following requirements:

1. The receiver hitch is directly attached to the motorhome chassis, not just to the bumper;
2. The rear-most point of the receiver hitch where the bicycle rack will be attached is no more than 64 inches from the rear axle of the motorhome; and
3. The vehicle is a class B type motorhome as described below.

Class B type motorhomes are commonly known as van conversions and comprise a completed van-type vehicle which has been altered to provide temporary living quarters. Class B type motorhomes have a gross vehicle weight rating of 10,000 lbs or less.

In addition, the 2 inch receiver Transfer™ v2 and the 2-inch receiver Piston Pro X may be used on RVs (both motorhomes and trailers) satisfying all of the following requirements:

1. The receiver hitch is directly attached to the RV chassis, not just to the bumper; and
2. The bicycle rack is in the 2-bike configuration with no add-on unit attached.

Please check the Warnings section of the User Guide for load weight limits applicable to your rack when used on an RV. Lower weight limits apply.

Even if the conditions above are met, any RV may be operated in a way that will expose Küat's products to conditions that they are not designed to handle. The operator of the RV is responsible to operate the RV in a manner that will not overload the rack, such as by excessive speed over rough roads or speed bumps, rapid turning movements, driving the RV over changes in gradient that will bring the rack in contact with the ground, or other similar actions.
